ECO FRIENDLY PRODUCTS

WHY ECO-FRIENDLY? ◀◀

Our goal is to help our customers around the world take action to do business more sustainably. By offering a wide selection of eco-friendly promotional products, we give the option to go green for your next branding campaign.

Eco-friendly is not a fad. It is a conscious effort to rethink the way we do business to contribute to a healthier planet for future generations.

This year, we are proud to offer new products that greatly reduce plastic consumption and products that use sustainable, organic materials that lessen our impact on Mother Earth.

Wheat straw plastic is an ingenious blend of renewable wheat straw and traditional plastics. The wheat straw blend reduces the amount of plastic in these new products, in some cases by as much as 70 percent.

Bamboo is not only a beautiful type of wood, it is also sustainable and renewable. Harvesting bamboo lessens the detriment to the planet by reducing harm done to virgin forests that would otherwise be destroyed for our consumption. Bamboo is also known to grow rapidly and is a remarkably durable wood.

Our popular rPET backpacks, totes, cooler bags and eco lanyards, are all made from recycled plastic (rPET), which is derived from polyethylene terephthalate, the type of plastic most single-use bottles and containers are commonly made from.

We are dedicated to doing our part to help the environment, one bag, one cup, one lunch box, one lanyard at a time. We are sourcing products and changing our process to empower brands to be more conscious when using promotional products in their next branding campaign.

Beautiful Bamboo.
